

Biggest Ever GIFA for Foseco

June 2015 saw Foseco have its biggest ever stand at GIFA, the world's largest foundry trade fair held in Düsseldorf Germany. With a total floor space of 1200 m², the stand was divided into three zones featuring the latest advances in foundry process technologies for iron, steel and aluminium foundries.

Representatives from 28 countries were in attendance generating a record number of customer enquiries, and hits on the special GIFA web site (www.foseo-at-gifa.de) exceeded all expectations.

Under the slogan of “The Plus for Your Business”, the 45 exhibits and 55 case studies presented demonstrated how advances in product and application technology from Foseco enable foundries to meet and exceed the ever-increasing demands for quality and consistency from their customers. Specific highlights included:

- STELEX ZR ULTRA and SEDEX ULTRA high porosity framed filters delivering enhanced inclusion removal at higher flow rates in iron and steel applications;

Foseco is a brand of the Vesuvius Group

FOSECO India Limited

Gat Nos. 922 & 923, Sanaswadi, Taluka Shirur, District Pune 412 208, India

Registered office: As above

- The application of FEEDEX and KALMINEX sleeves to DISAMATIC moulding lines, facilitating significant increases in casting yield;
- Methoding solutions for compact graphite iron applications
- The latest advances in the INITEK process for the production of ductile iron, incorporating temperature control, MSI +DC dynamic inoculation and ITACA thermal analysis;
- Coating density control in high production automotive iron foundry applications;
- SOLOSIL TX inorganic core binders for aluminium foundries;
- SMARTT degassing technology for the optimisation of the degassing and metal treatment of aluminium melts;
- INSURAL insulating dosing furnace and transport ladle linings for aluminium foundries

22 new technical papers were published to support the show and technical presentations on STELEX ULTRA advanced steel filters and SOLOSIL TX inorganic binders were given at the Technical Forum.

In addition, four live shows were presented featuring

- Integrated product and technology solutions at Nissan, Spain
- Enhanced process control in the iron melt shop
- SOLOSIL TX inorganic binders
- SMARTT – innovative process control for rotary degassing

Glenn Cowie, Business President of Foseco commented, “The record levels of visitors and enquiries reflects our customer’s ongoing need to drive innovation, quality, productivity and process control in their casting operations. The live shows were especially well received and clearly demonstrated the importance of application expertise and customer process understanding in maximising the value generated for our customers from the products and services we provide.”

Live show at GIFA 2015

Visitor numbers to the Foseco GIFA stand were an all-time high.
